

Brownfields Revolving Loan Fund: Ranken Technical College

Applicant
Ranken Technical College

Property Location
4321 Finney Avenue, St. Louis, Missouri

Property Description

4321 Finney was developed around 1911 as West End Laundry Company. In 2007, it became Assured Injection Molding. Three underground storage tanks were removed, and elevated concentrations of petroleum-related contaminants in soil and groundwater were cleaned up. The economic downturn has delayed original plans for increasing classroom capacity, and Ranken will use the property as green space until it becomes feasible to expand the campus.

Missouri Brownfields Revolving Loan Funding

EIERA awarded a subgrant to Ranken Technical College for \$200,000. The Missouri Brownfields Revolving Loan Fund, capitalized through a U.S. Environmental Protection Agency grant, supports cleanup activities for sites contaminated with petroleum, hazardous or controlled substances and mine-scarred lands.
